March 28, 2026

To whom it may concern ,

My name is Valentino Ciabattari, and I am currently enrolled in a Master's degree in Aerospace Engineering at Politecnico di Torino as part of a double-degree program with the Universidad Nacional de Cordoba. Through this letter, I would like to express my interest in undertaking a thesis that would allow me to move closer to the world of motorsport and applied engineering.

Much of my motivation for studying engineering comes from my passion for motorsport. I am deeply fascinated by its technical challenges, particularly in areas such as aerodynamics, vehicle dynamics, data analysis, and the development of practical solutions in demanding environments. At this stage of my academic journey, I would be truly excited to begin engaging more directly with this field by learning within a company setting and contributing to real engineering projects.

Along the way, I have been able to complement my academic background with technical experiences related to motorsport, which further strengthened my desire to build my professional future in this sector. I consider myself a hardworking, adaptable, and grounded person, with a strong willingness to learn, improve, and contribute through commitment and dedication.

To me, a thesis within a company would represent far more than an academic milestone. It would be a concrete opportunity to continue developing my skills, gain closer exposure to the professional environment, and begin finding my place in a field that truly inspires me.

Please find my curriculum vitae attached. I would be glad to provide any further information you may require.

Kind regards,

Valentino Ciabattari
Master's Student in Aerospace Engineering
